AQUALUX Link

Communicating and synchronising between various pool devices for an optimal and automated management.

With the Aqualux link range, make your pool a clever one!

Link

- Perfect water quality
- Energy saver
- Improves equipments lifetime
- Guarantees a peaceful state of mind

Items availability and shipping rules

To offer you the best possible service rate we divided our stock in various groups,(creating a 3 items statuses and types of orders in 2014).

Core products :
Products that are essential to the building of your turnover, marked with a flamingo on your 2014 catalogue.
Our commitment for these items: orders ready to ship within 24h to 96h.

Customized manufacturing :
Products manufactured following to your requirements, marked with a wrench on our 2014 catalogue.
Our commitment for these items: shipment of your orders right after the manufacturing is completed.

Assortment depth of range :
Additional products for your activity, marked with a clock on our 2014 catalogue.
Our commitment for these products: ordering your items upon reception of your orders and shipment within the requested time frame.

While stocks last :
Within the limits of available stocks.

From now on, the orders you will send us will be processed depending on the status of the items concerned, following the above procedures and according o the chosen INCOTERM.

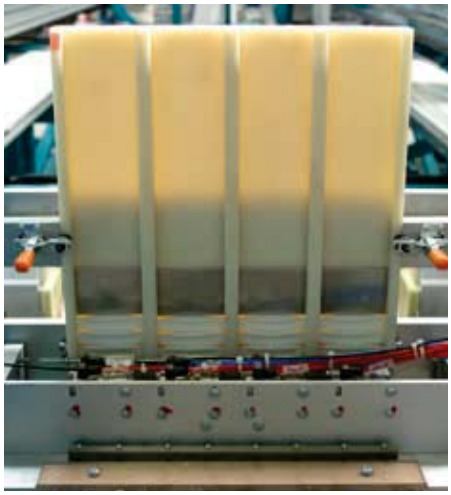
PRODUCTION UNIT
AUTOMATIC POOL COVERS

AQUALUX is equipped with a very efficient production unit for automatic pool covers.

Fully automatic, it allows the full production of a deck cover.

A water tightness test is carried out on each deck (through putting slats under water pressure) before being shipped out to the customer. This allows us to be fully compliant to the NF P 90-308 standard.



SLATS
AUTOMATIC DECK COVERS

COLOURS

White - sand - grey

SLATS 3 YEARS GUARANTEE

MADE IN FRANCE

QUALITY
- Wide slats (77 x 17mm) greatly improving the covers buoyancy, with 3 independent watertight compartments.

QUALITY WATERTIGHTNESS TEST ON EACH DECK GUARANTEE

CONVENIENT
-Removable end caps
- Adjustable size

ROBUST
- Anti-UV & anti-stain PVC slats

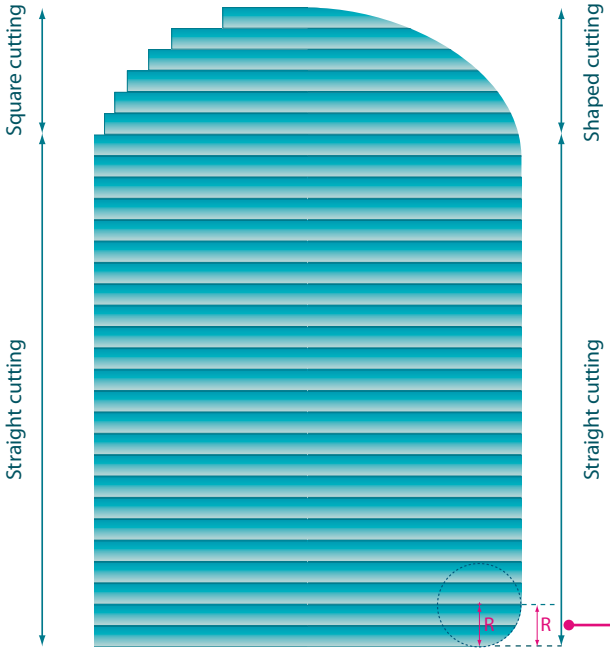
QUALITY
- Traceability for after sales purposes

QUALITY
- Thermo welded end caps
- Thin weldings

CUTTING TYPES

SQUARE CUTTING
- For all or part of free shaped pools (trapezoidal pools, rounded shape for stairs or else)

STRAIGHT CUTTING
- For all or part of perfectly rectangular pools



SHAPED CUTTING
- Offers a better aspect to the deck as it follows the pool's shapes

if R = 15 cm
Shaped cutting is offered

if R <15 cm
Square cutting is offered

if R > 15 cm
Square cutting or shaped cutting is to be taken into considera-tion on R length

COVERING
AUTOMATIC POOL COVERS

Levelled wall top

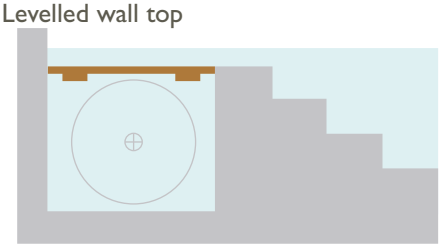
Casing with built separating wall

Levelled wall top



First step

ABOVE GROUND AUTOMATIC DECK COVER

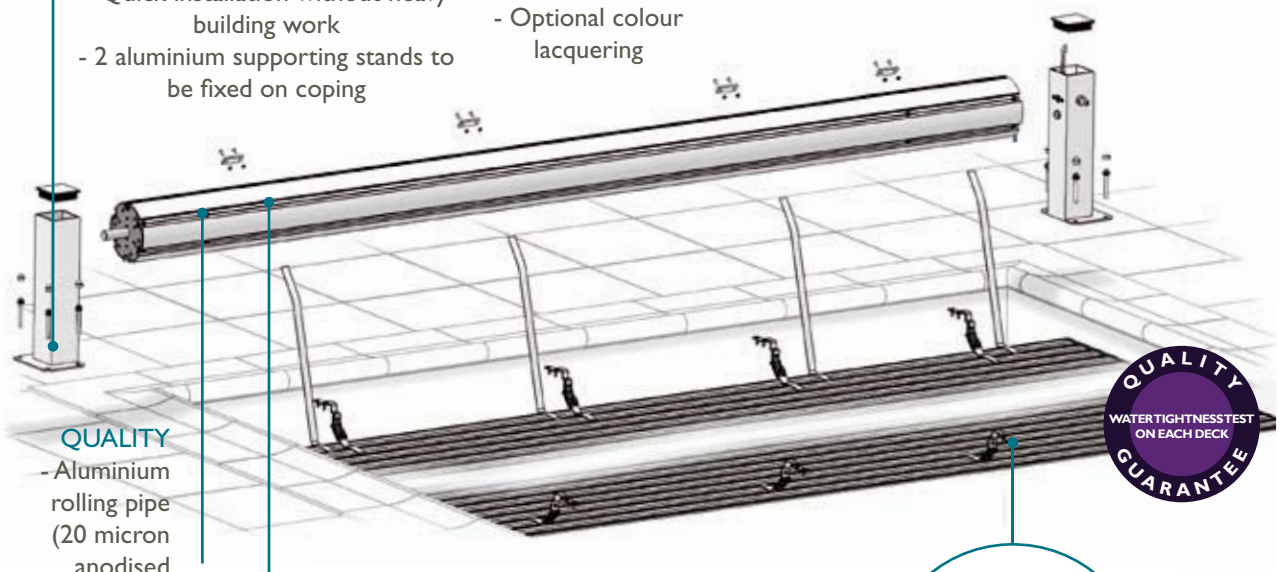
Quick and easy installation

- Perfect for pools up to 6.50 x 16m (excluding stairs)
- Secure, keeping water temperature stable, protecting against vegetal debris
- Integrated maximum length management of deck once unrolled
- No loss of bathing surface

EASY AND ECONOMIC
- Quick installation without heavy building work
- 2 aluminium supporting stands to be fixed on coping

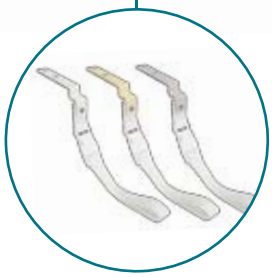
AESTHETICALLY PLEASING
- Optional colour lacquering

CONVENIENT
- Integrated control panel



QUALITY
- Aluminium rolling pipe (20 micron anodised 6060T6) diameter 187 or 190mm depending on dimensions

ROBUST
- IP55 24VCC tubular motor of different power depending on pool size
- Integrated maximum length management of deck once unrolled
- 316L stainless steel motor axle



SAFE
- Binder clips on pool's end
- Compulsory elements in order to be NF P 90-308 standard compliant
- Available for straight model

STANDARD NF P 90 - 308 COMPLIANT

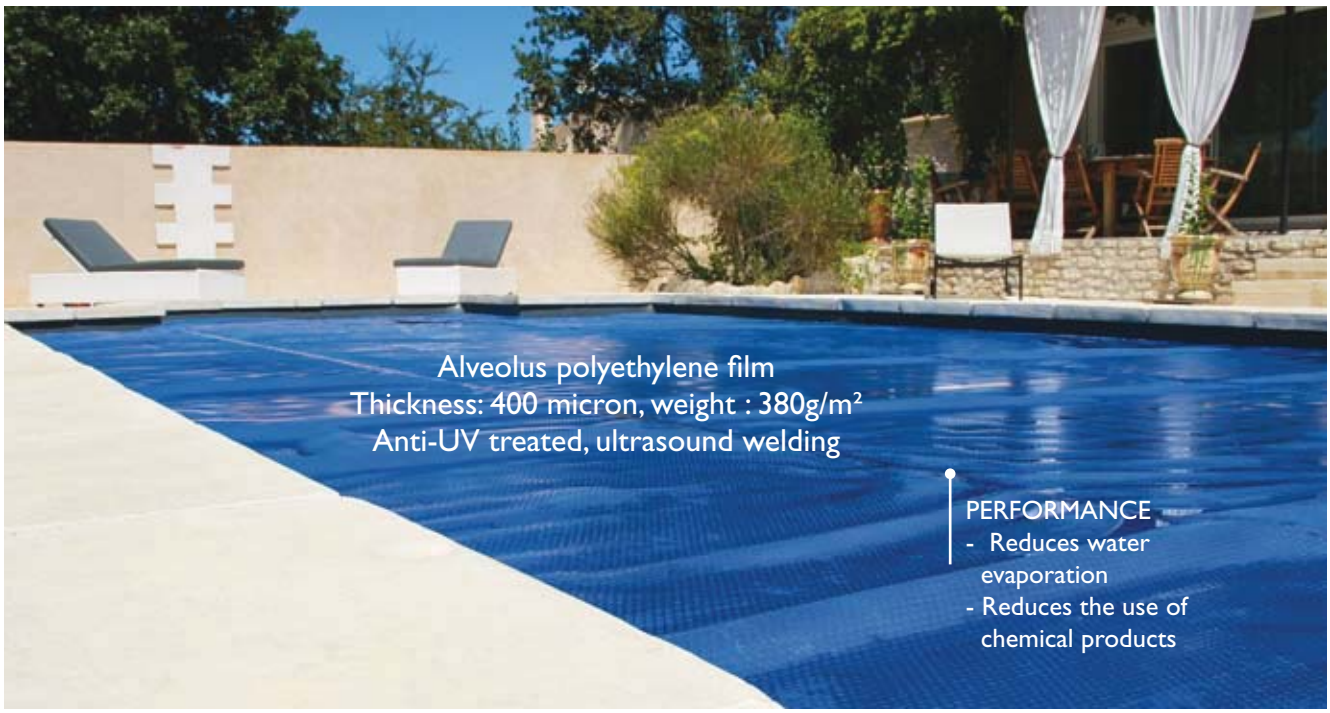
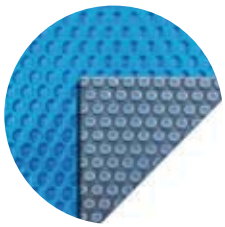
SOLAR COVERS



Alveolus polyethylene film
Thickness: 400 micron, weight : 380g/m²
Anti-UV treated, ultrasound welding
PERFORMANCE
- Reduces water evaporation
- Reduces the use of chemical products

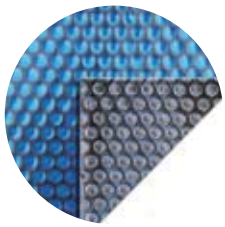
BLUE - BLUE

- Standard opacity
- Improves water heating during the day
- Keeps stable the water temperature achieved during the day



BLUE - SILVER

- Stronger opacity
- Higher calorific performance



BLUE - BLACK

- High opacity
- Very high calorific performance
- Limits the proliferation of algae
- Reduces the use of chemical products

CONVENIENT
- Increases water temperature
- Limits the loss of temperature
- Keeps stable the water temperature achieved during the day
- Protects the pool against leaves and dirt

SOLAR COVERS : RAW CUT EDGES

Cost saving

CONSTRUCTION
- Welded for a better water tightness

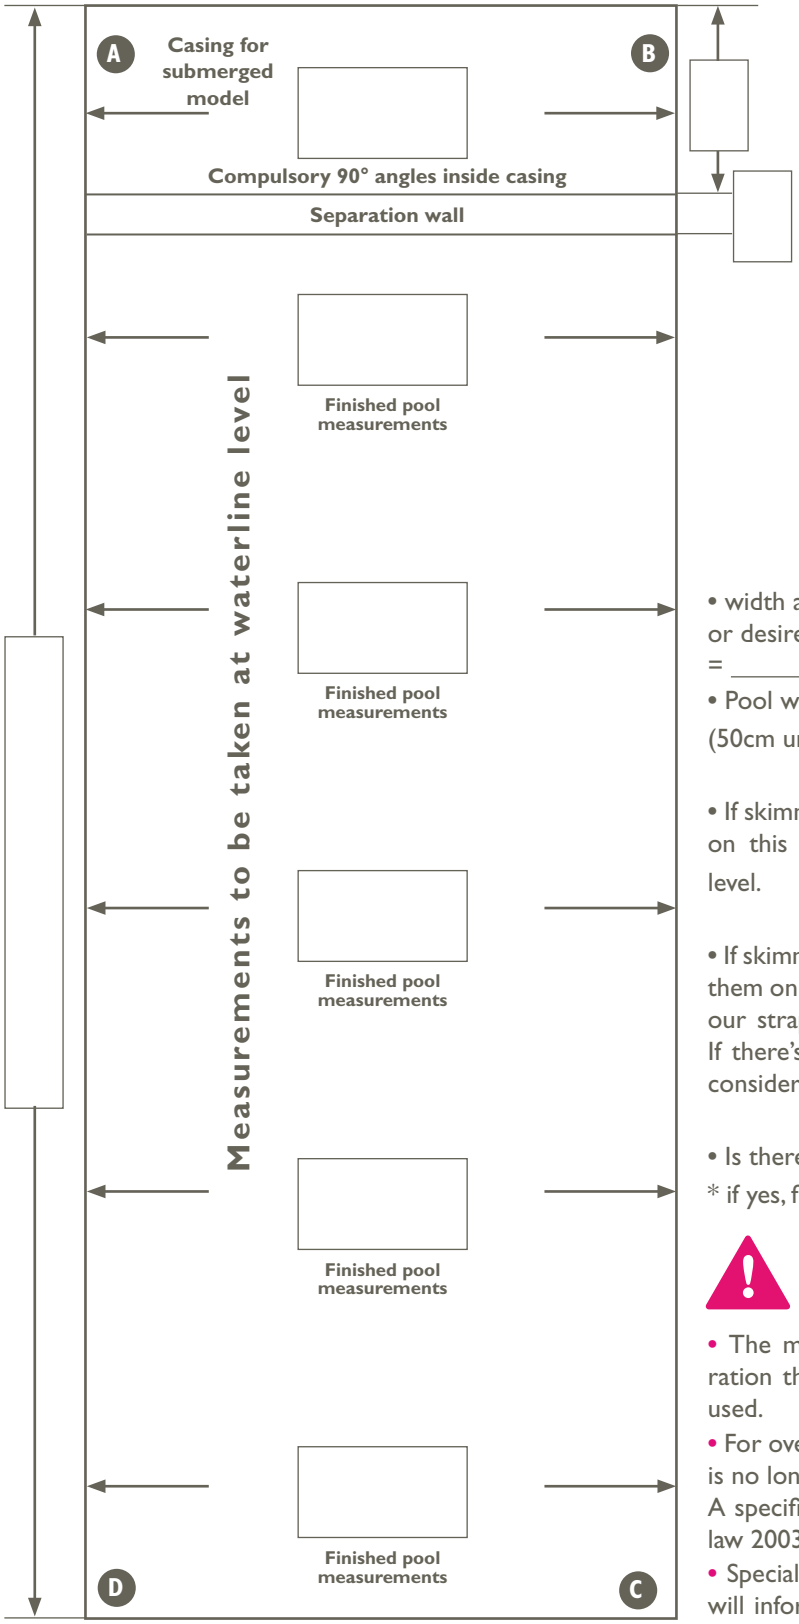
MEASUREMENTS TO BE TAKEN AT WATERLINE LEVEL – POOL FINISHED



POOL ANGLES

(if angles are cut or other shape, please provide a detailed drawing)

A ☐ 90° ☐ radius _____cm
B ☐ 90° ☐ radius _____cm
C ☐ 90° ☐ radius _____cm
D ☐ 90° ☐ radius _____cm
☐ Square cutting
☐ Free shape cutting
15cm radiuses: Free shaped cutting

DIAGONALS
A/C = _____ m
B/D = _____ m

• width at beam's slot= _____m
or desired length of beam when finished
= _____m
• Pool width at rolling pipe
(50cm under levelled wall top) = _____m

• If skimmers are placed on the pool's length, report them on this sketch and measure the pool's width at their level.

• If skimmers are placed on the pool's width, please report them on this sketch and mention their dimensions so that our straps buckles won't be affixed at the wrong place. If there's no specific information on the sketch, we will consider the standard position of our straps.

• Is there a stair in this pool ☐ yes* ☐ no
* if yes, fill in sheet n°3.

• The measurements provided must take into consideration the existing pool coating or the one that will be used.
• For overflow swimming pools, the automatic pool cover is no longer considered as a safety system.
A specific system is to be installed so as to comply with law 2003-9 dated January 3rd 2003
• Special stair or deck cutting: our technical department will inform you about the compliance of the cover with the current safety law (France).

Fill in this form, send it by fax at 0033 4 60 92 43 99 – Tel: 0033 9 78 03 20 30

• VEGA COVER INFORMATION

Colour (always beige on coping's side) : ☐ Blue ☐ Lawn green ☐ Almond green ☐ Grey ☐ Sand

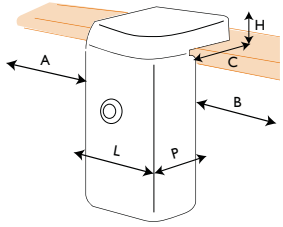
Overhang on coping : ☐ Standard 30 cm ☐ Other (< 40cm) : _____cm

Extra manual crank : ☐ 1/3 ☐ 1/7

• POOL INFORMATION (WATER SURFACE DIMENSIONS) :

Stair (made rectangular) : ☐ Along width ☐ Along length

Width between coping ends (L3: for stair along length) : _____ **m**



Filtration unit: Width L : m Depth P: m unit/coping height H : m
A. position of unit m B. Position of unit m C. Depth over coping m

Filtration unit must be rectangular on pool's side so as to be compliant with security standards (side plan is compulsory)

CALCULATION METHOD

·Round m² up to 1 decimal after coma. The cover will always be rectangular. All dimensions are taken over water surface.

·**Rectangular shape pool A**
A pool price = (maximum pool length water surface + 0.60) x (maximum pool widtj water surface + 0.60) x cover price per m² depending on pool's shape

·**Stair along width A+B**
Stair along side surface (P1 depth water surface stair) x (L1 width water surface +0.60) x cover price per m²
Total price = A pool surface price + B along width stair surface + stair cutting extra cost

·**Stair along length A+C**
Stair flap surface along length = (P stair depth water surface + 0.30) x (L2 width water surface + 0.60) x stair flap along length price per m²
Total price = A pool surface price + C stair flap along length price + stair cutting extra cost

CALCULATION OF THE SURFACE OF A WINTERING COVER
(to be rounded up to the nearest m²).

• Watertight cover: (overhang dimension = 0.70m)	(Length + 0.70) x (width + 0.70) x m² price
Example: 8x4m swimming pool	(8+0.70) x (4+0.70)= 40.89 so 41m² x m² price
• Net cover: (overhang dimension = 0.60m)	(Length+0.60) x (width+0.60) x m² price
Example 10x5m swimming pool	(10+0,60) x (5+0,60) = 59,36 36 so 60m² x m² price

• Standard overhang dimension for 32cm coping. Other overhang dimension to be mentioned on the manufacturing form.

• For stairs bigger than 10m², please calculate them just like a cover (L+overhang dimension) x (overhang dimension/2). For net covers, stairs will be made rectangular.

Extra cost for stairs		Straight stairs	Roman stairs
	Along pool's side	Add 6.50m² to net cover Add 7.00m² to watertight cover	Add 6.50m² to net cover Add 8.50m² to watertight cover
	On pool's end	Add 8.00m² to net cover Add 9.00m² to watertight cover	Add 8.00m² to net cover Add 10.00m² to watertight cover

CALCULATION OF THE SURFACE OF A SOLAR COVER

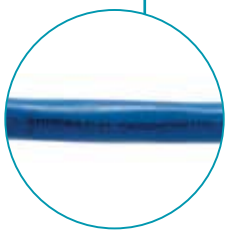
- Exists in LED version



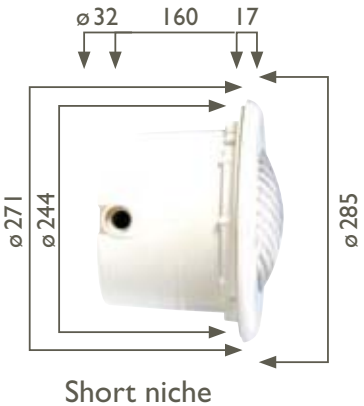
EASY TO INSTALL
- Adhesive protection during pool building

LONG LASTING
- The ultra flexible cable used was build to be used permanently under water (AD8 class).

UNIVERSAL
- Exists in short niche and long niche versions to fit to the structure

DIMENSIONS

Long niche



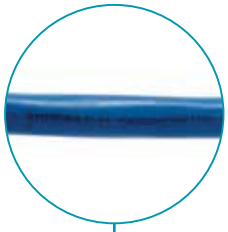
Short niche

UNDERWATER LIGHTS

LED

UNIVERSAL
- PVC coated deformable flaps ensuring an optimum grip inside niche (diam. 215mm to 250mm)

LONG LASTING
- The ultra flexible cable used was built for a permanent immersion (class AD8)



COST SAVING
- Exists in LED version

THE IDEAL REPLACEMENT SOLUTION, NO BAD SURPRISE!
(Worn o-rings, deformed plastic parts, broken optics)

COUNTER CURRENT SWIM

USER FRIENDLY
- On/Off pneumatic switch

- Directional Jet

- Massage hose (provided)

EASY
- Can be assembled on all types of swimming pools : concrete, prefabricated, liner panels, liner concrete

HIGH PERFORMANCE
- 55m³/h at 10m water column single phased
- 60m³/h at 13m water column three-phased
- Adjustable air/water Venturi mix

ADAPTABLE
- Available in separate parts allowing the installation of the white good while building up the pool. To be completed with the finishing parts later on

USER FRIENDLY
- Electric control panel with motor circuit breaker and management of the pneumatic control provided

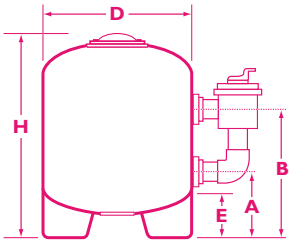
LAMINATED STRATIFIED FILTER

SAFE
- Steel reinforced filter's neck ensuring a proper bolting

RESISTANT
- Metacrylate bolted translucent lid



WATERTIGHT
- Moulded thread ensuring a perfect water tightness to the connection between valve and filter tank

EFFICIENT
- Closed base limiting dead zones and improving the filtration quality (same process as for public pools' filters)

EASY MAINTENANCE
- Integrated water and sand drains = no need to empty the sand from the filter top

Non contractual picture

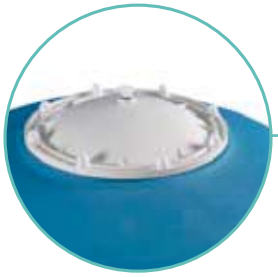
LAMINATED STRATIFIED FILTER

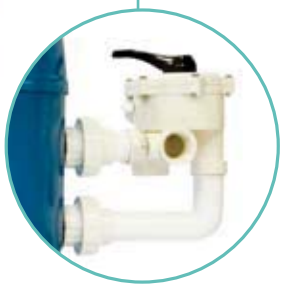


Bolted dome

AVAILABLE WITH MOTORISED VALVE VERSION

PERFORMANT
- The Aqualux star-shaped lateral system allows a uniform suction which improves filtration quality

EASY MAINTENANCE
- Water and sand drains integrated to the tank = no need to empty the filter's sand from the top opening



EASY ASSEMBLY
- With union fittings
- The preassembled valve kit allows an instant assembly

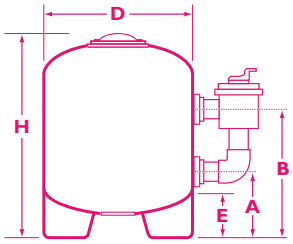
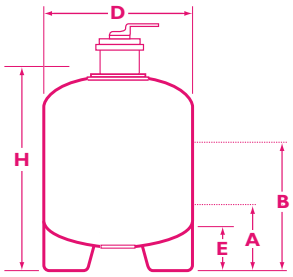
BLOWN SAND FILTER

QUICK
- The flanged dome is held by a fixing clamp, there are only 2 bolts to be tighten.





PERFORMANCE
- The Aqualux star-shaped lateral system allows a uniform suction which improves the filtration quality.

SAFE
- Clipped base: no sticking and no drill holes in the tank that could weaken it

Water drain + removable base

CONVENIENT
- The diameter is etched upon each filter's neck

AQUALUX FILTRA PUMP

EASY TO USE
- Self-blocking translucent lid (using the key provided) for an easy opening and filter's basket checking

EASY MAINTENANCE
- High capacity basket in 3 parts (with positioning guide) for an easier cleaning

Metallic reinforcements

ECONOMICAL
- The new Filtra saves up to 20% energy compared to the former model

- Base with mounting brackets and vibration absorber

- Drain cap on strainer and pump's body

EASY INSTALLATION
- A 2" suction inlet to increase the pump's efficiency
- Only 1 pump body for the whole range

PERFORMANCE
- Salted water compatible up to 7g/litre

MOTOR 3 YEARS GUARANTEE

AQUALUX ABOVE GROUND POOL PUMP

ADAPTABLE KIT SAND - ZEOLITHE

CONVENIENT
Easy access to the strainer's basket thanks to 2 "butterfly bolts"

Removable 0.75L strainer with positioning slot

1 1/2" suction inlet (to skimmer)

XL square seal

Connection deck box

1 1/2" return inlet (to valve)

New !

Screwed fan cover

Moulded plug on a 1.5m long cable

CONVENIENT
Adjustable stand

Aluminium base

ROBUST
One-piece injected polypropylene pump body 30% loaded with fibreglass

Drainage screw

Model presented: 100517/100518. Ask for the technical sheet for references 103651 and 100514.

ELEXIUM CONTROL PANEL

- Hinge assembly

EASY ASSEMBLY
- Dovetail wall mounting: allows to drill, line up and screw without much efforts

- Opening and closing thanks to 2 ¼ turn screws

CONVENIENT
- Easy handling with front switch and clearly understandable symbols

SAFE
- Easy handling with front switch and clearly understandable symbols

EASY TO INSTALL
- Easier handling and wiring thanks to a lowered unit bottom
- Easier wiring thanks to the hinge assembly and cable glands placed in front of the connection terminals

Depth: 13cm

- A cable-stopper prevents all risks of tearing of the power supply cable while in operation

SPACIUM CONTROL PANEL

SAFE
- Motor protection by adjustable circuit breaker

CUSTOMER FRIENDLY
- Translucent front panel protecting
- Direct access to components

ROBUST
- Reinforced rotating control knobs.

CLEAR
- Information reminder on front panel

SAFE
- Input/Output using cable glands

UNIVERSAL
- Broad range (3 spotlights, slaved starts, differential switch)

AQUALUX HEAT PUMPS

• FRONT

PERFORMANCE
- Reversible HOT / COLD:
During hot periods
Cold mode: Maintains temperature for an improved comfort of bathing
Limits the deterioration of linings
Ensures an optimum disinfection

ROBUST & NOISELESS
- Anti corrosion ABS cabinet mounted on a metallic chassis.

- Anti corrosion ABS cabinet mounted on a metallic chassis

New !

10m cable provided

OPTIONS

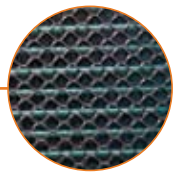
- Anti vibration supporting pads

- Electronic expansion valve and defrost system through the use of a 4 way Saginomiya valve, for an optimum operation and a longer time of use.

Link

• BACK

CONVENIENT
- Back output with 2 union fittings (50mm diam.)



-Thin blue anti-corrosion blades

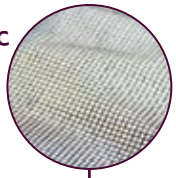
SAFETY FENCING

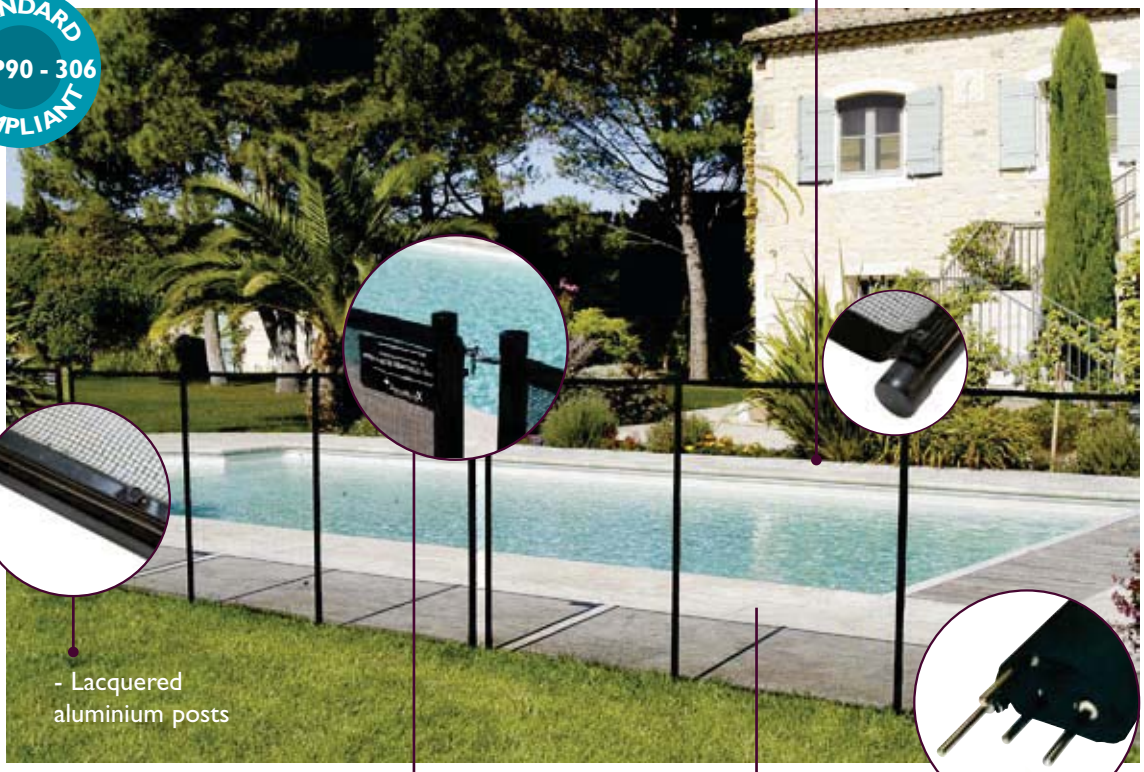
Preventive Security System

- Ultra resistant anti UV treated, PVC coated polyester fabric
- For all types and all sizes of pools
- Prevents children under 5 yrs old from getting access to the pool
- Private pools



SAFE
- Transparent black fabric to ensure an easier pool watch

STANDARD NF P90 - 306 COMPLIANT



- Lacquered aluminium posts

CONVENIENT
- Each modules comes with a double action lock. Opening and closing are clearly visible

EASY
- 3m long x 1.25m high pre-mounted modules

AESTHETICALLY PLEASING
- Unobtrusive and convenient, fully dismountable. Can be rolled up entirely.

Pool Size	Distance between pool & fence	Number of modules
8x4m	1m	11
	1.5m	12

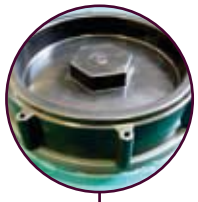
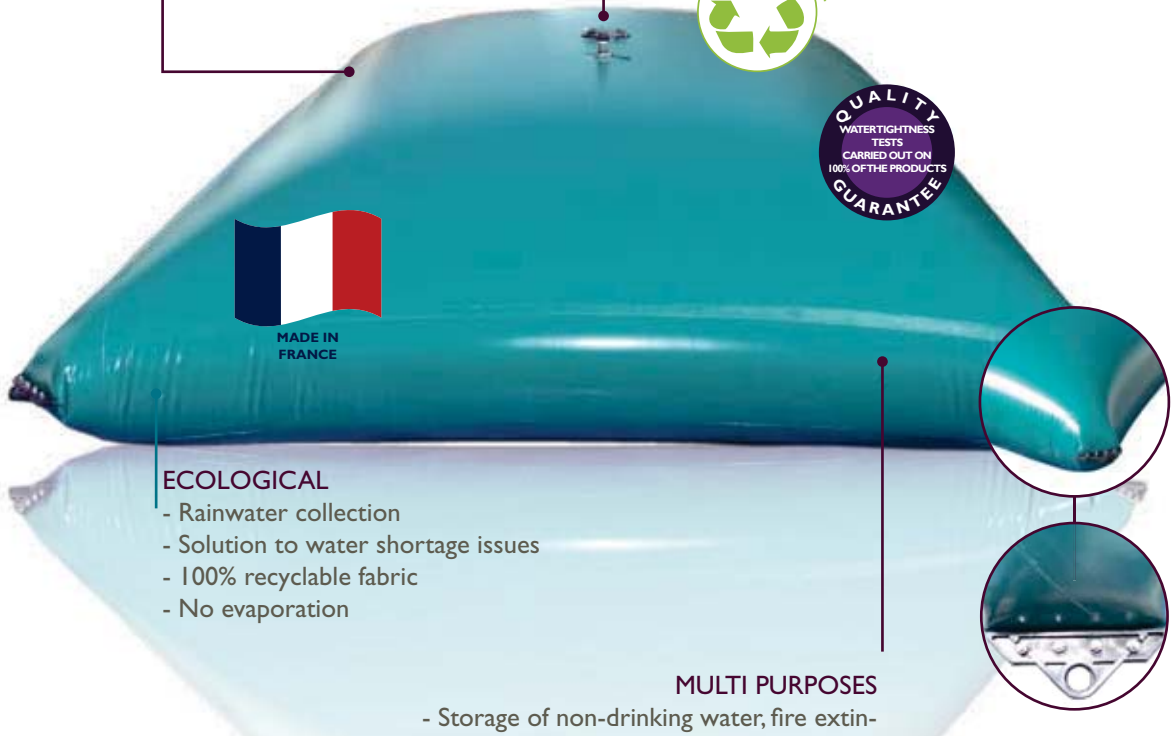
SOFT WATER STORAGE TANK

Quick to install, does not require an authorization for building

QUICK
- Easy fittings = water available in minutes
- Gardena® type fitting



EASY
- Preassembled accessories



ECOLOGICAL
- Rainwater collection
- Solution to water shortage issues
- 100% recyclable fabric
- No evaporation

MULTI PURPOSES
- Storage of non-drinking water, fire extinguishing water, swimming pool water, filter cleaning water
(for other uses, please contact us)

Offers a 30m³ storage

ADAPTABLE
- Can be installed indoor or outdoor

COST SAVING
Complies with the French tax decrease for rainwater collection (25%), Law n° 2008-1425 dated December 27th 2008. (Must be installed by a professional; please refer to official texts for general recommendations). Complies with the French 5.5% VAT rate: Taxes' Official Bulletin 3C-7-06 N° 202 dated December 8th 2006. (Compulsory installation by a professional).

SHADE SAILS

EFFICIENT
- Blocks up to 86% of sun light

RESISTANT
- The fabric is made with a peripheral hem for a better finishing
- Stainless steel eyelets are placed all around the sail's edges (every 30cm) so as to lace it up.

ROBUST
-Wide 5cm Velcro® tapes are sewn over reinforcement stripes so as to avoid a lift up effect in case of wind.

LONG LASTING
- All assembling made by high frequency welding making the sail's quality highly reliable.

GUARANTEE 2 YEARS Fabric & welding

In normal use conditions the sail must be withdrawn in case of snow or strong wind (the mention "strong wind" is according to Meteo France's definition). The guarantee does not prevail in case of natural disaster.

INSTALLATION AND MAINTENANCE
- SUNSET shade sails are coming "ready to be installed" thanks to the fixing kits (tight sails) or thanks to the peripheral bungee cord (sail on support) provided.

DOWNLOAD OUR FULL CATALOGUE ON www.aqualux.com

TIGHT SAILS

CUSTOM MADE

- Custom made following to the measurements provided by our customers
- The maximum surface of the sail must be 25m² with a maximum distance per side of 8m.

EASY MAINTENANCE

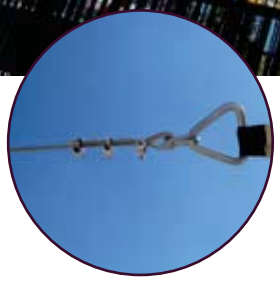
- Easy cleaning using soapy water

ROBUST

- The sail is made with a double peripheral hem in which a high resistance strap is inserted. This strap holds a wide 316L stainless steel ring on each angle.

GUARANTEE 2 YEARS Fabric & welding

In normal use conditions the sail must be withdrawn in case of snow or strong wind (the mention "strong wind" is according to Meteo France's definition). The guarantee does not prevail in case of natural disaster.



QUICK INSTALLATION

- After having installed the anchoring for the fixing kits (chemical anchoring), install wire-strainers between the sail's rings and the anchor's rings. Adapt the desired tension by adjusting wire-strainers.
